RESEARCH EXPERIENCE

- **Positivity of line bundles on toric varieties** 09/2023 - present
With Prof. Lei Song
 - **Study** the case where the pair (X, L) of a toric variety X and a line bundle corresponding to a polytope P has the N_p properties.
 - **Theories/topics used:** stability of syzygy bundles, derived category of toric varieties, resolutions of toric subvarieties, Klyachko's classification of toric vector bundles.
 - **Computer tools:** SageMath; Macauley2.
- **Tropical geometry** 09/2023 - 01/2024
 - **Explored** the problem "Curve Counting Problems and Tropical Geometry"
 - **Wrote** a survey for a graduate-level course.
- **Minkowski sum of latitice points in lattice polytopes** 09/2022 - 09/2023
With Prof. Lei Song
 - **Studied** which lattice polytopes are normal, specifically whether the lattice points in an $n + 1$ dilation of a polytope P can be written as the sum of a lattice point in P and a lattice point in an n dilation of P .
 - **Original problem:** Oda's conjecture.
 - **Results:** by covering simplices with dilations, I proved that simplices with large lattice length in dimensions 3 and 4 are normal.
 - **Wrote** computer program (Python, matlab) to evaluate the normality of lattice polytopes with large lattice length.
